

Ph.D. student in Computational Systems Biology at the Luxembourg Centre for Systems Biomedicine

The Luxembourg Centre for Systems Biomedicine (LCSB) was created within the Health Technologies Initiative from the Government of Luxembourg as one of the research priorities of the University of Luxembourg. The LCSB is an Interdisciplinary Centre of the University, independent of the faculties and it combines experimental and computational approaches to analyze complex biological systems and disease processes from a systems biology perspective. The Computational Biology Group (CBG) provides the LCSB with a solid infrastructure in developing theoretical framework for computational modeling on biomedical problems, especially in the area of network biology. The CBG group includes researchers with theoretical, computational and wet lab backgrounds, thereby providing an unusual interdisciplinary environment.

The Computational Biology Group seeks a highly skilled and motivated Ph.D. student to work on an exciting project that aims to combine epigenetics, transcriptomics and phosphoproteomics data to integrate different layers of regulation for understanding cellular disease-related dysregulations in the context of the immune system. In particular, the selected candidate shall develop a computational integrative model of gene regulatory and signaling networks to identify disease-related genes and signaling pathways. This is a collaborative project with the RIKEN institute in Japan, where computational predictions will be experimentally validated in animal models.

Requirements of the ideal candidate:

- Master degree in computer science, engineering, physics or a related discipline
- Strong computational skills
- Prior experience in mathematical modelling of biological networks is desired
- Excellent working knowledge in English.

We offer:

- Opportunity to do research into biomedical problems within a highly dynamic research institution (LCSB) and in collaboration with internationally recognized partners
- An exciting international environment
- A very competitive salary

For further information, please contact:

Prof. Dr. Antonio del Sol

E-mail: antonio.delsol@uni.lu

Applications should contain the following documents:

- A detailed curriculum vitae
- description of past research experience
- name and addresses of two or three referees

All applications should be sent preferably in electronic version before October 1st, 2017 to the following address:

Luxembourg Centre for Systems Biomedicine (LCSB)
University of Luxembourg
6, avenue du Swing
L-4367 Belvaux
Tel: +352-466644-6982 (Office)
